PROFILE

Software Engineering student building and shipping real Next.js 16 platforms, Supabase cloud backends, signed Android APKs, and Blender 3D Python scenes. I build and verify complete digital products - combining clean HTML/CSS/TypeScript engineering, relational cloud databases, and automated testing.

TECHNICAL STACK

Next.js 16 - React 19 - TypeScript - Tailwind CSS v4 - Supabase (PostgreSQL, Auth, Storage, RLS, Edge) - Drizzle ORM - React Native 0.74 / Expo SDK 51 - Zustand - Vercel - GitHub Actions - Python - Playwright - Blender 5.2 (Cycles GPU) - FFmpeg (9:16 vertical pipeline)

SELECTED WORK

My English Practice - Audio-first spelling drill, FSRS review. 13 levels, 408 items, 24 phonics patterns.

DailyMB Quiz Helper - Expo/React Native app, 3x/day cross-verified cloud fetches, signed APK via CI.

Blue Peak Clothing Store - Next.js + Supabase storefront, RLS admin portal, Cash on Delivery.

Town Fitness Point - Abbottabad gym platform with programs, trainers, schedule and memberships.

ReviewNudge SaaS - Review reminder product with PRD, roadmap, architecture and phase plans.

Ibrahim Promo Studio - TikTok / Instagram / Facebook growth packages and a FFmpeg short-form pipeline.

SERVICES

Full-Stack Web Apps | Mobile Apps (APK) | Gym & Store Websites | 3D Blender & Video

WORKING METHOD

Discuss - Design - Build - Launch - Support. Fixed-scope milestone pricing, live preview links, and type/lint checks plus real mobile viewport testing before final handover.

Languages: English & Urdu | Local time: UTC+5 (PKT) | Available for freelance projects.
